Safety instructions
Dump truck Driver

Please note that it is now forbidden for our checkers to open the door of dump trucks. All truckers must go out to open their dump truck door and then go around the front of the truck to secure the door. Not under any circumstances should you ever pass behind a truck when the door is open.

When you lift the dumpster to unload, you need to make sure no one is on the side of the dumpster. The checker should be on the side of your cabin and back at the same time as your truck advances in a straight line. Once the dumpster is unloaded you have to stop your truck to get it down. Then our checker can verify the load.

For any problem, please contact a foreman (white helmet) or a team leader (blue helmet).

Any driver who does not comply with these safety instructions will be forced out from our facilities.

I count on your support in applying this new rule for the safety of all.

A handwritten signature in blue ink, appearing to read 'GW', is written over a large, horizontal, blue scribble that spans across the width of the signature area.
